## QA Engineer

### PROFESSIONAL SUMMARY

---

QA Engineer with a developer's background and a hands-on approach to test automation, API validation, and quality processes. Since 2021, contributed to Financial Network Inc. through manual and automated testing of web applications using Playwright with TypeScript, Postman, and SQL-based validation. Leverages AI tooling (Claude) to accelerate test planning, streamline documentation, and reduce repetitive QA work while maintaining accuracy and oversight.

Launched a freelance web development business in 2018 while completing a technology degree at Ranken Technical College, delivering projects for nonprofits and supporting students through tutoring and youth coding instruction. Recognized by a 30-year veteran IT instructor as "one of the hardest working students I've ever had" and "an exceptional leader and developer who thrives both independently and collaboratively."

Seeking a role that values quality, clear communication, and technical rigor — with opportunities to contribute meaningfully and continue growing as a QA professional.

### CAREER HISTORY

---

#### Financial Network Inc.

St. Louis, MO

##### QA Engineer

August 2021 – Present

- Build and maintain Playwright automation projects for front-end and full-stack validation
- Lead the overhaul of Postman collections and environments, implementing pre/post-request scripting for more reliable API testing
- Leverage Claude to assist with front-end validation, API request execution, and database query verification — reducing repetitive manual work while maintaining accuracy and oversight
- Perform unit, integration, regression, smoke, sanity, performance, and API testing across customer environments
- Develop test cases and define acceptance criteria during sprint planning
- Lead sprint planning meetings to align development and QA priorities
- Review and verify customer requirements to ensure test coverage and alignment with expected functionality
- Document customer application workflows using structured tables and visual diagrams for clarity and onboarding
- Performance testing of high-traffic workflows using JMeter

#### Gosnell Web Design (Contract and Volunteer)

St. Louis, MO

##### Web Application Developer

November 2018 – Present

##### Horseman

- Developed a blog-style site with React.js with themes and settings managed via external JSON
- Site content managed through a headless CMS (Strapi), deployed on AWS with database hosted on Strapi Cloud
- Developing a customizable site-building service through Upwork

#### St. Charles County Veterans Museum

- Built and designed a custom WordPress theme from the ground up using JavaScript and PHP for querying data from the WordPress REST API
- Created custom post types for the museum owner to easily manage news, events, and veteran stories
- Developed companion Android application for museum visitors

#### Serpro Logistics

- Recreated outdated website using WordPress; presented updates to client periodically and made adjustments as necessary

#### Missouri Grass-Fed Meats

- Determined requirements with client and delivered a single-page WordPress site on time
- Handled deployment and domain transfer/renewal

### **Code Ninjas**

St. Louis, MO

#### **Code Sensei / Coding Instructor**

December 2018 – September 2020

- Taught children to code using JavaScript, Python, and block programming
- Developed presentations and assisted with events to promote the business

### **Ranken Technical College**

St. Louis, MO

#### **Tutor — Information Technology**

August 2019 – May 2020

- Tutored students in ASP.NET, C#, Java, and web design under Professor Jeffrey Scott

## **EDUCATION**

---

**AS, Associate of Technology — Ranken Technical College, St. Louis, MO** 2020

Summa Cum Laude, 4.0 GPA

**AS, Associate of Applied Arts — St. Charles Community College, Cottleville, MO** 2018

## **SKILLS & TECHNOLOGIES**

---

**Testing & Automation:** Playwright + TypeScript, Postman (API Testing), Selenium + Java, JMeter

**AI Tooling:** Claude (AI-Assisted QA Workflows)

**Languages:** JavaScript (ES6+, AJAX, jQuery), TypeScript, Java, SQL, Bash

**Frameworks & Libraries:** React.js, ASP.NET MVC/Core, Node.js

**CMS & Web:** WordPress (+ Custom Themes), HTML, (S)CSS + Bootstrap

**DevOps & Cloud:** AWS, CI/CD (Jenkins), Version Control (Git)

**Tools:** Jira, Content Management Systems

## **RECOMMENDATIONS**

---

Friday, September 25, 2020

My name is Jeff Scott. I am an Information Technology Instructor at Ranken Technical College. I have been an instructor in the Application and Website Development program for the last 4+ years, and before that taught in the Wisconsin Technical College System for 26½ years.

Luke is one of the hardest working students I have ever had. He became an exceptional programmer and website developer while at Ranken — always on time, high quality, excellent attendance. He served as a tutor for his last year and did a great job whether working individually or as part of a team. During his final semester, Luke became deeply involved in a pro bono project for the St. Charles Veterans Museum, recreating their website and building a companion Android app.

I would give Luke Gosnell my highest recommendation as both a student and person.

Jeff Scott, IT Instructor — Ranken Technical College | jpscott@ranken.edu | (314) 286-3675

The following is from Luke's employee review by Mike Salter, Project Manager at Financial Network Inc.:

"Luke started this position with little to no experience, just a desire to learn. He continually seeks to increase his responsibilities, always willing to take on a new customer and learn new things. Luke takes full advantage of opportunities that arise and often creates opportunities from seemingly adverse situations. He is always on the lookout to volunteer assistance. In addition to all of his QA activities, Luke has learned customer configuration and volunteered to create reporting SQL queries. Luke actively pursues self-development opportunities relevant to his position. He recognizes that asking for help is part of getting the job done and makes his needs known before problems develop."
